REAR ADMIRAL BULLARD DIES IN WASHINGTON

Was Chairman of Federal Radio Commission and Pioneer in Wireless Field.

By the Associated Press.
WASHINGTON, Nov. 25. — Rear Admiral William H. G. Bullard, retired, chairman of the Federal Radio Commission and one of the important figures in the development of radio in the United States, died suddenly yesterday at his

home here of heart disease.

His efforts to solve the complex problems of radio is believed to have so lowered Admiral Bullard's vitality as to produce the condition which resulted in his death. He had been actively identified with radio development for a quarter of a century and this had earned him the title of "Father of American

Pioneer in Radio Field. It was Admiral Bullard who in 1919, awakened government officials to the necessity of acquiring patent rights to the Alexanderson alternator, the most reliable instrument for radio communication over water, if America was to retain its supremacy in the radio field. The rights were obtained over a spirited competition from other coun-tries and out of this acquisition was created the Radio Corporation of America. President Wilson released Admiral Bullard from his naval duties in order that he might become a member of the board of directors of the new company.
Bullard is credited with having

been largely responsible for the arrangement by which press messages could be sent by navy trans-mitters, making it possible for news from America to be printed in Ha-wail and the Philippines to which other means of rapid communica-tion were lacking. He aided in defending the interests of the United States at the International Radio Conference which has been in session here since Oct. 4, and at which 70 nations are represented. Served in World War.

Born Dec. 5, 1866, at Media, Pa., Builard was graduated from the Naval Academy in 1886. He served on the Columbia in the Spanish-American War and commanded the battleship Arkansas during the World War, serving in the Atlantic fleet and in the American division of the British grand fleet. He also commanded the United States naval forces in the Eastern Medi-

In 1921, he was in charge of the Yangtse patrol force in China.
He is survived by his widow,
Mrs. Beirne Saunders Bullard, and
a son, Lieutenant-Commander B. S.

CORNERSTONE OF TUTTLE MEMORIAL TO BE LAID SUNDAY First Unit of Structure Will Con-

tain Swimming Pool and
Club Quariers.
The cornerstone of the Bishop
Tuttle Memorial, a diocesan and
community building adjoining

Christ Church Cathedral, will be laid Sunday afternoon at 2 o'clock by Bishop Frederick F. Johnson. The first unit of the memorial,

now in process of construction, will consist of seven stories and will include a swimming pool, gymnasium, offices-for the clergy and staff, club rooms and living quarters for the social service workers, and an auditorium dedicated to the memory of Montgomery Schuyler, dean of the Cathedral for more than 40 years.

Funds for the erection and endowment of the present unit were raised by a campaign shortly after Bishop Tuttle's death in April. 1923, to which Jews, Roman Catholics. Protestants and the general public contributed. A final unit, including a tower, will be erected in the future.

Bishop Daniel Sylvester Tuttle was Bishop of Missouri for 37 years and Presiding Bishop of the Episcopal Church of the United States for more than 20 years.

shin and knee, and caused Dr. T. Says Burden of Guilt, If Any, F. Johnson to nurse a flesh wound Rests With Law Rather Than With Press.

Judge Faris, sitting in St. Louis, that newspapers take their hands off a case as soon as a court puts its hands on it, and keep their hands off until the court has removed its hands. He has directed an inquiry with contempt proceed-ings in view against reporters and editors who printed the facts that a man was defendant in one day in the same court before two juries on similar charges of violating the liquor laws, and for printing the verdict of the first jury before the second had made known its views.

Judge Faris granted new trials in both cases, upon the contention of defendant's attorney that juro's might have been influenced by the newspaper reports. The juries claim that their verdicts were based upon the evidence and not upon anything they read in the newspa-

"Here again is a statement of fact in a conflict of press and law and again, in our opinion, the burden of guilt, if any, rests with the law rather than with the press. "If the rights of the defendant could be impaired by having the second jury become aware that the defendant was already on trial, or had been convicted of a similar of-fense, why did the court schedule the trials as it did? Why did it not heed the plea of defendant's attorney that the second trial be postponed? Is it unheard of that a rry retires for the night unable to agree, to reassemble the next morning and reach a quick verdict?

Is such an event prima facie evi-dence of improper influence? "It appears that Judge Faris be-came zealous in protection of the defendant's rights only after routine news reports had revealed that his conduct of the cases, though possibly in accord with precedent, might itself have been prejudicial to the defendant.

"There will be no contempt pro-ceedings in this case, we are confident. There will be no adoption of what Judge Faris ealls the "En-gash rule" forbidding newspapers to touch upon matters before the courts. Such matters are definitely within the province of our free press and we feel sure that further judicial encroachments beyond the for 79 Years present recognized limits will meet with resistance certain to insure their failure."

Groups of 30 or 40 Wednesday physically prevented Jewish boys and girls from reaching their classes. In isolated cases where they got through the barriers demonstrators invaded the classrooms and dragged the Jews out.

In Fuenfkirch University, the Nationalists took such a threatening attitude toward a group of Jewish students that the latter barricaded themselves in a lec ture hall with benches piled against the door. The men maintained the barricade while the girls leaped from windows and escaped. When ionalists leaped in with hard rub ber blackjacks. Several of Jews were knocked out.

At Cgegedin, Nationalist youths held a protest meeting against the reform of numerous clauses of the law by which Jewish students are limited. The Nationalists de-manded that Jews be excluded en-

tirely. They also dragged Jews from all the university buildings but did no other harm. Jewes Attacked Away from School. At Budapest University, Rector Ernst Finaccy issued a notice that further demonstrations would be punished by expulsion. The Na-tionalists then adopted new methods. They gave an hour for the Jews to leave the university before being hunted out and beaten

The Government thought it had found a clever formula for keeping higher education exclusively for the Magyars, who control the war veteran societies and hold most of the public offices as well as most of the land, leaving little room for others. But the Nation-

SWISS BRIDE-TO-BE EXCLUDED FROM U.

Had Planned to Wed, Then Return Home-Appeals to Secretary Davis.

By Leased Wire From the New York Bureau of the Post-Dispatch. NEW YORK, Nov. 25 .- This love story began in Zurich, Switzerland, when Anna Mennij wore her hair in pig tails. It was proceeding to a happy ending when United States

Anna, daughter of well-to-do parents, and Erwin Eisenhut were schoolday sweethearts. They were engaged in high school. But Zurich is an old, slow town. Erwin heard much of America from a sister and from friends, who had preceded him here. He came a year ago and found work. It was understood Anna would follow soon, after he had established him-

The agreement was a little vague. The delay seemed painfully pro-tracted. So, after six weeks or so, Anna packed a trunk and prepared to sail for New York. Perhaps she would get a job and wait a while longer. She had money to pay her

But Anna got only as far as the United States Consulate in Zurich. She explained she wished to go to America to be married to Erwin. The quota—2081 Swiss immigrants annually—was filled and there was a waiting list for several years to

Anna that it should be possible for a reputable Swiss subject to visit America. And, if she visited America, was there any law to forbid being married to Erwin while here? Apparently not. They talked it over in their letters. It would be tragic, of course, for her to return to Switzerland at the end of the visit, but would not that be better than not being married at

Anna, 19 years old, went again said she wished to visit America, and they gave her a visa accordingly. She arrived on the Columbus a week ago. She had not dreamed that American red tape still would bar her from her beloved. Back in Zurich, she had written on the paper that the per-son she would visit was Erwin Elsenhut. Erwin lives with his sister and brother-in-law, Mr. and Mrs. Albert H. Klager, in Queens Village. Mrs. Klager was to be

Anna's hostess.

Immigration officers detained her on Ellis Island and accused her of coming to marry Erwin and of intending to remain with him. A heard of special inquiry ordered

Klager, who is associated with the banking firm of L. F. Rothschild . Co., interceded for her, offering to give any guarantee required that Anna would be a "visit-or" to his wife and not to Erwin; and that at the expiration of such visit, Anna, married or single would return to Zurich.

The end of the story is not yet written. The final paragraph will come from Secretary of Labor James J. Davis, to whose discretionary powers Anna has appealed.

Carlstrom declares that the law affecting mutual benefit associations passed by the Legisla-

The many letters were evoked by recent publication of an inter-pretation of the law by the Attorney-General, which held, in effect, that members of the old benefit socities more than 70 years old cannot become members of the new socleties because of provisions of the new law. The 1927 law provides that all mutual benefit societies be dissolved. They are allowed to re-form, but each reincorporation makes an entirely new company, of which persons past 70 may not be

Dynamite Set Off on Porch of Former State Senator's Home at 610 Clay Avenue, Kirkwood.

A bomb was exploded early yes erday on the front porch of the residence of former State Senator A. E. L. Gardner at 610 Clay avenue, Kirkwood, causing damage of opproximately \$600.

The only occupants of the house, Gardner and his wife, were sleep-ing on the second floor when the explosion awakened them, and others in Kirkwood, at 1:20 a. m. No

one was injured.
Gardner, a lawyer, attributed the explosion to reprisal for the open-shop activities of his son-in-law, Herbert Hausman, manager of the Manufacturers' & Merchants' Association of St. Louis, who lived until a month ago at the Gardner home and now lives across the

Gardner's residence, called "The Lindens," formerly was the Mermod estate. The large two-story frame house is situated on a block of ground between Clay and Essex avenues and Kirkwood road.

The bomb was loaded with steel slugs. The explosion damaged the porch, tore a hole, a foot in di-ameter, in the wall, shattered windows, wrecked kitchen furniture and damaged living room furni-Steel slugs penetrated the outer wall and became imbedded in the inner walls and furnishings. Gardner offered a reward of \$1000 for the arrest and conviction of the dynamiters. Gardner is at. torney for Sheriff Wilmas and has criminal as well as civil law pracice, but he does not believe this esponsible for the explosion.

This was the third bombing attributed to open shop troubles, combs having been exploded on Nov. 16 and 17 at the L. A. Wright Electrical Co., 207 1/2 North Third street, and National Electric Service Co., 209 Washington avenue.

LIGHTER SENTENCE GIVEN MAN WHO ROBBED BANK OF \$31,700 Judge Rosskopf Reduces 20-Year

Term of Leo M. Harrison to 15 Years in View of Family. Circuit Judge Rosskopf, who, oct. 31, sentenced Leo M. Harrion to 20 years in the State Penitentiary for robbery, today summoned Harrison from City Jail and

changed the sentence to 15 years. Harrison admitted slugging his enefactor, Harry B. Givens, secreary of the Vandeventer Trust Co. escaping with \$31,700 in cash and securities Feb. 7, 1925. was caught after two years in Virginia when he attempted to cash a son of the husband of Givens

mother by a former marriage. In reducing the sentence today, Judge Rosskopf told Harrison that if he behaved in prison he probably would be released within 10 years, to return to his family.

The 20-year sentence, recom nended by the Circuit Attorney, had been more than Harrison expected, and he had his lawyer ask Judge Rosskopf for permission to withdraw the plea of guilty, so he Rosskopf refused this request, but reduced the sentence, he told reporters, in consideration of Harrison's family and his previous character, and, also, because he now thought 20 years a little too severe.

TO GO TO U. S. COURTS

By Leased Wire from the New York Bureau of the Post-Dispatch. NEW YORK, Nov. 25 .- Recourse to the Federal courts will be attempted on behalf of both Ruth Snyder and Henry Judd Gray, their

attorneys indicated yesterday.
Samuel L. Miller, chief of counsel for Gray, said he would ask a writ of habeas corpus in the United States District Court next week on the ground that Gray's constitutional rights were invaded. A late law which permitted Gray and Mrs. Snyder to be tried jointly deprived Gray of a proper trial by a jury of his peers, Miller contends. This—one of the Baumes laws—has not been reviewed by any higher court than the Court of Appeals. According to this court, the power of the Judge to decide whether defendants jointly indicted shall be tried separately or together is a rule of common law which the Baumes law, has

merely restored. Miller said he would appeal to the United States Supreme Court, if necessary, to prevent the execution now set for the week of Jan.

Joseph Lonardo, attorney for Mrs. Snyder, announced he would confer with former Judge Edgar F. Hazelton, her chief trial counsel.

Compact Will Be Signed Today By Delegates of 79 Nations.

the Associated Press.
WASHINGTON, Nov. 25.—The International Radio Conference was called together today to give its final approval to a new wireless convention.

The compact will be the last word in efficient and scientific radio regulation, its drafters declare, combining elasticity for future imrovements with elimination of past outstanding communication difficulties. The delegates of 79 nations and territories assembled to pass in second and last reading on the new document, which the conference has been busy negotiating since Oct. 4. The ceremony of signing the treaty was next on the

Under terms of the convention the original of the treaty will be preserved in the State Department ere where the exchange of ratifications also will take place.

Hoover to Make Address.

A farewell address by Secretary of Commerce Hoover, chairman of the conference, so was on the program, together with speeches of appreciaion prepared by most of the chiefs of the leading delegations. A special ceremony by the conference was occasioned by the sudder leath of Rear Admiral Bullard, retired, chairman of the Federal Radio Commission and an American delegate.

On account of the insoluble deadlock which developed during the conference regarding the al-location of votes among countries for future references, and the uncertainty therefore as to the number of signatories which each na-tional delegation would be allowed to affix to the convention, an agreement was reached setting no limit upon the signatures of any delegation. The provision was added, however, that the number of these would provide no claim

for votes in future conferences.

The new convention's chief difference from the previous 1912 treaty and its peculiar importance arise principally from its allocaion of wave lengths to the various international radio services and in he provisions for new radio activities whose possi' ilities were not ven suspected in 1912.

The bulk of the convention and

of the regulations dealing with radio procedure, with rules for the operation of fixed and ship staions, for distress and ordinary communications, and other routine cases, does not differ materially rom the previous regulations. Even one of the chief sources o

satisfaction to the American dele-gation, namely, the principle which has been firmly established in this conference of maintaining all private operation of radio concerns free from Governmental interference, is not strictly speaking in conflict with the provisions of the previous radio convention. Howver, in this parley, the American thesis had to withstand such serious pressure from European dele-gations that its retention is consid-

ered as a distinct success.

Wave Lengths Allocated. In allocating all wave lengths between 30,000 and 5 meters, the new convention amplifies the previous compact as at that time short waves were entirely in the experi

The new services which have received special recognition at this conference are radio-compass, ra dio beacon, weather bulletins and airship communications. Frequencies and priorities have been established for them. One wave has been allocated to the distribution of criminal news for the readier apprehension of fugitives from

The convention and regulations are regarded by the conference experts as standardizing radio practice to a much greater degree than under the 1912 radio convention. which had become superannuated. Defects of the previous convention also have been corrected and the new provisions affecting radio activities which are yet in the stage of development have leen so drawn up as to carefully avoid cramping initiative, especially in allocation of the short waves. Above all other benefits, delegates say, tower those which will derive from the wave allocation, with the resultant elimination of the intercations, existing in late years.

GRANITE CITY HUNTER ACCIDENTALLY KILLED

tephen Ferhart Shot by His Weapon After He Climbed Fence Near Newbern, III.

Stephen Ferhart, 47 years old, of franite City, was killed yesterday y the accidental discharge of his shotgun when he attempted to pull it through a fence which he had just climbed while hunting near Newbern, Ill.

A step-grandson, George Grimm, who was with Ferhart at the time, ummoned Mrs. Ferhart, his brother, Arthur, and another youth, who had been waiting in a machine near the field, but before they reached a farmhouse Ferhart had

Ferhart was a former resident of St. Louis and had recently been employed as a construction foreman at a new public school build-

at Alton.

A Coroner's inquest stated that
Ferhart had died of a wound just in the right armpit. The body was taken to an undertaking establishment in Jerseyville, preparatory to burial in Granite City. Mrs. Fer-hart was under a physician's care last night following a collapse. Mrs. Ferhart's first husband, Liewellyn Dowling, was killed by robbers several years ago.

PORTFOLIOS FOR AMERICANS Three Reported Slated for Places in Nicaraguan Cabinet. By the Associated Press. MANAGUA, Nicaragua, Nov. 25.

—El Comercio, local Nicaraguan newspaper, has published a report that the Nicaraguan Cabinet will be remodeled by the appointment of American officials to various Cabinet posts.

American Charge Dana G. Mun-

ro, and other American officials here, said they knew nothing about the matter. There has been talk about Cabinet changes in Managua for some weeks. The changes in the Cabinet as reported in El Comercio, included the appointment of Gen. E. R. Beatie of Alexandria, Gen. E. R. Beatie of Alexandria, Va., who is now chief of the Nic-araguan National Guard, as Min-ister of Police and War; Col. Clif-ford D. New Fathometer Will Make Plotting Possible While Ship Is Traveling.

By the Associated Press.
WASHINGTON, Nov. 25.—Sound echoes traveling up from the ocean bottom in measured intermittency hereafter will guide both the mariner feeling his way through fog or night into harbor, and the government coast surveyor sounding for ocean depths.

Director E. Lester Jones of the coast and geodetic survey in his annual report, the ninety-sixth of the service, today announced the perfection of the depth-determining device and explained the proficiency which has been attained

The fathometer, as the instrument is called, sends out a series of shar, rapping noises from the ship's bottom, catches the rap echo which rebounds from the ocean bottom, and by calculation of the time consumed in the emission and eturn of the sound, reports the exact depth of water under the ship at the moment. It works at a high speed, reporting the depths as requently as four times per second, even while the vessel on which it is mounted steams along at full

"I am glad to report that our estimate of this device has been fully justified and that our co-operation has been of material assistance in bringing to perfection a very important contribution to navigation," Jones said. The survey area with the device than before, he added, and the mariner can find his position at sea by comparing a series of soundings with depths shown on his chart.

Old Line vs. Reciprocals Likely to Stay in Back ground but to Be a Factor Nevertheless.

TRIAL BALLOONS SENT UP BY KOELN

Many Possible Candidates for Governor in Sight -Hyde's Activity a Matter of Interest.

By CURTIS A. BETTS. Back of the surface efforts of -called Republican leaders of St. Louis to concentrate their support on one candidate for the nomination for Governor, some active and usually informed Republicans see an element of business politics, into the secret of which few of the leaders and probably none of the

candidates so far have been ad-

mitted. It is a revival of the battle waged in each campaign between the conflicting reciprocal and old line in-surance interests in the State for control of the Missouri Insurance Department through the appointment of a State Superintendent of Insurance whose friendship can be

counted upon.

While various questions of poliical expediency enter into the Republican gubernatorial negotiations, all of which will have more or less importance in the final shaping of the organizations of the several candidates in the primary, the insurance interests appear in the background as the actual superior

Reciprocal Group Won.
It was so in the 1920 campaign

and again in the 1924 campaign, in both of which the reciprocal insurance group supported the successful candidate, in many in-stances regardless of the previous political allegiance of the indi-viduals of the group. When the time came for selection of a Super-intendent of Insurance the appointment in each instance went to a man whose associations had been

with the reciprocals,
In hearings before a State Senate Committee in 1921 the state-ment was made by a representative of old line companies, and not denied, that the reciprocals con-tributed liberally to the campaign fund of Gov. Hyde, the successful Republican candidate, and al-so of John M. Atkinson, the defeated Democratic candidate, the idea being that whatever the result of the election the Reciprocals would have a sympathetic listener in the lovernor's chair. Gov. Hyde attempted to name

as head of the Insurance Depart-ment one B. W. Boley of Kansas City, a member of a law firm in which Dan V. Howell, a brother of Charles M. Howell, widely known insurance lawyer and the real head of the reciprocal interests in Missouri, was a member. Charles M. tired from the Governor's office, formed a stock life insurance company, of which Hyde was made president and of which Howell is tive committee and general coun-

How Ben Hyde Got His Joh. Boley was obnoxious to the old line insurance men because of his ociation with the Howells, and they brought all manner of pressure on the Governor to prevent the appointment, which was being urged by the Governor's brother, Ben C. Hyde, as the only favor he

would ask.
The old line men selected Homer B. Mann of Kansas City, an old line insurance agent and a strong supporter of Gov. Hyde in the cam-paign, to see the Governor and get him away from Boley.

In presenting his argument Mann became excited, exclaiming: "Nam eanybody in the State ex-cept Boley. We will be satisfied with anybody. We would even take your own brother."

The Governor slammed his fist down on the table. "That's it," he said, "Ben it shall be." Mann had not figured on that. He had gone a bit far in saying Ben would be satisfactory to his group, but it had not occurred to him that Ben would even consider it. Ben was a man of considerable wealth and of wide business interests, and had been the leader in the fight to have Boley named. But

ing, and Ben was appointed. When the Baker-Nelson cam-paign came on in 1924, Joshua Barbee, a member of Charles M. Howell's law firm, became chair-man of the Democratic State Com-mittee, while Baker had the sup-port of Gov. Hyde and Superintendent Ben Hyde. FRIDAY EVENING, NOVEMBER 25, 1927_

Continued From Preceding Page. ing with one important faction in St. Louis in the selection of a candidate who will have their support in the primary.

There are political difficulties t be surmounted and there is little likelihood of a deal being perfected until there has been a certain amount of skirmishing, some of it of a serious political character.

As the situation now stands, rural Republicans, active in organization affairs, are disposed toward the nomination of a St. Louisan for Governor, but because of their local conditions are not in a position to accept just anybody the St. Louis politicians may wish to

Koeln's Trial Balloom

While St. Louis undoubtedly will want a candidate safely wet, the country does not want one too wet. The Koeln faction several weeks ago suggested Henry S. Caulfield, to whose support it probably would not be difficult to bring the Kiel faction, but who is said not to be satisfactory to Circuit Clerk John Schmoll. The Caulfield idea has There has been no particular objection to him, but, probably because he is little known outside the city, the feeler did not get any sort of reaction, either good or

Lately there has been some talk that Koeln intended to make a similar try with Phil Brockmann former President of the Police Board, but there is nothing to indicate he would be any more successful than he was with Caul-

So far there has been no deftnite trend within the St. Louis organization toward support of Jesse W. Barrett, former Attorney-General, who has a very decided following outside St. Louis. If Koeln, Kiel and Schmoll could get together on Barrett there would be little doubt of his nomination because of the support he would receive out-

There have been some negottations for St. Louis support for Dr. James Stewart, State Health Com-missioner, who has some following, but there has been nothing to ndicate that Stewart stands in any other position than among those inder consideration.

Possible Nominees.

Among the newcomers in the list of prospective candidates is E. E. E. McJimsey of Springfield, forner editor of the Springfield Republican, who was defeated for the nomination by Gov. Hyde in 1920. McJimsey, remembering his experience with St. Louis party leaders in 1920, might be justified in asking a bond for faithful perform-ance of pledges should he succeed in lining up St. Louis support. He had the Koeln-Foristel group with him in 1920 until well along in the campaign, but on election day its votes went to Hyde. McJimsey has a considerable strength in the Ozark section and in the campaign would be a candidate for the others to reckon with.

William R. Schneider of St. Louis, whose platform is economy in public expenditures and establishment of a budget system in the State government, so far has not entered the calculations of the St. Louis Republican leaders as a candidate to whom they might give aid. Schneider's platform does not appeal to the practical politicians, whose control of party organization depends on an ever-increasing umber of jobs to be apportioned to the faithful, and if he makes lement of the party which thinks more of efficient government and curtailment of governmental costs

than it does of providing jobs for political workers. Others under consideration for the nomination are Probate Judge Sam D. Hodgdon of St. Louis County, who has filed, and Lieut. Gov. Phil A. Bennett of Springfield, who has visited St. Louis on sevral occasions to discuss his possible candidacy with those whose

ssistance he desires. It is too early for the impend ing insurance fight to enter even emi-publicly in the St. Louis skirmishes, and it is doubtful if it will ever become a matter for open discussion in conferences. Business in politics is something usually held at the back of the minds of the manipulators and not boldly discussed in political con-

Hyde Said to Be Interested.

One report which has caused considerable comment is the in-terest former Gov. Hyde is said to evince in the guber atorial race. As the story gare. Hyde, because of his personal unpopularity with a large element of the Republican voters in St. Louis, has decided that he will not seek the nomination for nited States Senator, or for any other office, but will be vitally interested in the selection of a candidate for Governor. Hyde, how-ever, says he has not decided thether he will be a candidate for the Senate. It is said Hyde contemplates forming a law partner-ship with an influential Kansas City Democrat, who notwithstanding his former and later political ociations, was an active supporter of Hyde in 1920 and a contributor to the Republican cam-

There have been reports that Hyde has sought an alliance with the Koein-Foristel group in St. Louis with the idea of consolidating his strength out in the State with its strength in St. Louis in the belief that this would be an invincible combinaton in the primary. It is not unlikely that such a deal could be effected if a candidate wet enough for St. Louis and dry enough for Grundy County could be found. Therein, of course, lies the difficulty. There have been reports that

Occupants of Chicago House Escape Injury; Body of Slain Informer Found.

By the Associated Press.

CHICAGO, Nov. 25.- Explosion of another bomb, the third in as many nights, at the home of Peter Spingola, alleged henchman of the Genna brothers, is regarded by police as an indication that Chicago's gangland is still at war.

Henry Spingola, a brother of Peter and a relative of Peter Genna, was killed a few years ago as he stepped from a barber chair. Police regard the bombing today as a warning to Spingola.

The bomb was tossed into a bedroom, but members of the family were in another part of the house and escaped injury.

LOCATION OF TEXAS GUSHER

Highest Producing Well in U. S. Is ROLLA, Mo., Nov. 25 .- The larg-

est oil well in the United States and the second largest well in America was brought in recently in the Yates pool in Texas, a pool discovered last July by the Transcontinental Oil Co. K. H. de Cousser, a former St. Louis boy and an alumnus of the School of Mines and Metallurgy here, was the ge-ologist for the Transcontinental in this region, and after a study of the geology recommended that his mpany drill a test well. The well had an initial flow of 800 barrels in an hour after hitting the shal-

to make only a small amount of oil, but later on an hourly proration test it produced 2059 barrels in a 45-minute period. At this rate the new gusher would have made 65,880 barrels a day. The development of the well, together with several other discoveries in the Pecos sands, has brought out the fact that this field is capable of an output of 1.000,000 barrels a day, if allowed to run un. estricted. This one well has a production in

De Cousser, who graduated from the School of Mines only five years ago, mapped the surface geology under the direction of the Continental company before the drill-ing was started. The results of his survey were used by him as the basis of a thesis for a professional

intendent Accused Them of "Vicious Combination."

By the Associated Press. NEWARK, N. J., Nov. 25.—Three indictments charging criminal libel of three Judges stood today against the Rev. Dr. Marna S. Poulson, State Superintendent of the New Jersey Anti-Saloon League.

The indictments were returned by the Grand Jury of Essex County, in which Newark is located, after an investigation of state-ments by Dr. Poulson in which he said he had linked Judge Walter D. Van Riper, Frank A. Boettner and Nicholas Albano "with general charges that there was a vicious combination existing between organized vice and disorganized law

Dr. Poulson, who said he spoke as an individual and not as an official of the Anti-Saloon League, declared he inferred no personal corruption in his charges. He said the Anti-Saloon League would support him in any charges of vice conditions in the city, however.

The indictments grew out of Dr. Poulson's charges in a recent debate with Arthur Garfield Hayes of the American Civil Liberties Union in which he asserted three judges in Essex County "were in on the gambling game." Later, in statements to newspapers, he named the Judges to whom he said

he had referred in the debate. He subsequently said he "merely linked them up with general charges that there was a vicious combination existing between organized vice and disorganized

GOVERNOR SEEKS TO SETTLE COLORADO COAL STRIKE

nces He Will Personally No tify Mine Owners of Plans to End Wage Controversy.

By the Associated Press.

DENVER, Colo., Nov. 25.—Netions to settle the Colorado coal strike today occupied State officials and miner leaders. With the exception of seven shots fired from an automobile near a mine in Southern Colorado, Thanksgiv-ing day passed without incident.

Miners generally occupied them-selves with memorial meetings for the five workers killed in a skirmish with State police in Northern Colorado Monday, and with circulation of petitions asking Gov. W. H. Adams to call a meeting of operators and employes.

Gov. Adams announced that he would personally notify the mine

owners today of plans to effect a settlement of the wage controversy. He intimated that if such a plan failed, he would order the State Industrial Commission to investigate the walkout called Oct. 18 by Industrial Workers of the

Louis N. Scherf and his 20 State police, who were exonerated by a Coroner's jury which investigated the shooting of the five miners has returned to Walsenburg in the southern field. This left about 375 National Guardsmen to continue patrol of the northern district. Mine owners plan to resume operations in this district Monday.

CHINESE PIRATES TO DIE

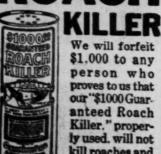

By the Associated Press. HONGKONG, China, Nov. 25.— Seven Chinese pirates, tried for the seizure of the steamer Irene in Bias Bay Oct. 21, were sentenced to death yesterday.

Pirates attacked the Irene en route from Shanghai to Amoy, shot the steward, robbed the 150 passengers, overpowered the officers and took the vessel into Bias Bay, notorious lair of freebooters. The British submarine L-4 appeared ring loot. It fired one shot into the engine room of the Irene and rescued the crew and passengers. The Irene was sunk by the submarine as a menace to navigation. THE NEW CHARIOT. From the New York World.

TO THE hundreds of colleges and universities which have now made courses in advertising part of their curricula we commend the advance advertising of the new-model Ford as a piece of work as important and as classic in its own field as, let us say, Spinoza's "Ethics" in the field of philosophy. Here, if not the com-pletely perfect bit of salesmanship of all ages and all climes, is something to rank with the top-note: ers. It is rumored that the car will be a six. A startled country rubs its eyes. The rumor is contradicted. It is rumored that the famous hood will undergo a change and that the time-hingred radiator is to have its face lifted. This rumor too is controlled. But picture purporting to represent the new-model car in action and at rest are smuggled to the p. ss, debated by the nation, disavowed by the Ford Company, replaced by other pictures which in turn are half-confirmed, debated, disavowed -and the car-that-is-to-be remains consistently on the front page of the newspapers, thanks to a policy o mystery combined with an occasional tip that looks authentic. Not since the Hall-Mills ca have so many people so far from the scenof action been giving each other the lowdown and telling each other the inside story.

Of course, it i fairly easy '? Mr. Ford to turn a trick like this, a. a great den easier than it would be for any other man whose factory was working nights to stock up with new goods. For Mr. Ford is rebuilding something that has become a familiar landmark on the modern scene. That narrow-chested little iron monster which he sprang upon the nation some 20 years ago s not a mere conveyance in which we ga about the country. It is a integral part of of ethos of our generatio 1, it we gauge the worth of other cars, the wealth of other men, the social standing of our neighbors. We live in an age that .uns around on wheels, and the Ford car, first in the field to sell to million; is a symbol of our new mobility. Why shouldn't we be interested in any radical juxtaposition of its parts? Mr. Ford is not tinkering with a car. He is remodeling a great tradition

CHILDREN AND TRAFFIC.

From the Philadelphia Public Ledger.

MORE than 150 Philadelphia women who have lost children in traffic accidents have organized a "mothers' safety council" to co-operate with the Citizens' Safety Comttee of the Chamber of Commerce in appealing to other mothers to teach their children to be careful when in the streets. The organization also has for its object the eduction of traffic casualties by education of the drivers of motor vehicles. The American Road Builders' Association has issued a statement calling attention to the fact that more than 7000 children under 15 years of age are killed on the streets and highways of the country every year, in addition to which approximately 175,000 children are seriously injured. More than 28 per cent of all traffic fatalities last year destroyed children, most of whom were between the ages of 6 and 10. Philadelphia's Mothers' Safety Council should be the first

of many. Women who have lost children in traffic accidents—gold star mothers of mod-ern traffic, as they were characterized at the organization meeting—can make an appeal to the public and the authorities that no other group could hope to make.

INDISCRETION NOT IMMORALITY. From the Brooklyn Daily Eagle.

THAT one immoral act does not make an Immoral person is the essenc- of the decision of Federal Judge inch in the case of Mrs. Maria Draginsky, whose naturalization is permitted, though technically the Judge only followed the statute which prescribes that the applicant for citizenship must have led a moral life for five years preceding the application.

to folly and finds too late that men betray, may be, of course, despair and a sinking into immoral living. And then, again, it may not. Conceivably one sinful indiscretion may compel a new start in character-building. Honest students of human nature, like hon est theologians, have never been inclined to flout the theory of educative sin as Hawthorne worked it out in "The Marble Faun."

We do well to rate the privilege of citizenship highly and to put around naturalization such safeguards as lawmakers can devise. But as between a mother, aged 24, who is living, as is her son, with her own father and mother, and the man who is alleged to have informed against her, on what happened in Russia, we are quite certain the woman would make the better American citizen.

The decision of Judge Inch will have general approval from humane and right-thinking men and women. It is a common-sense decision, perhaps an inevitable decision under the statute, but it attrac's attention because it stirs thought on some sociological prejudices that are only indirectly connected with the immediate issue of citizenship.

BUILDING A WAR SCARE. From the New York Post.

E DWARD E. SPAFFORD, national commander of the American Legion, chose Armistice day as a suitable occasion for an alarmist address on the inevitability of another war. The American people, he declared, now realize that war to end war did not accomplish its purpose and that, as a matter of fact, "only an armistice was signed." With a defeatism which he would not tolerate if we were actually engaged in war, he disparages the whole campaign for peace and international understanding. His words tend to create a war psychology which is more dangerous to anything else he could do. The history of prewar Europe shows how popular expectation of war tends to create the thing it fears. We shall never be free from that specter so long as responsible persons continue to think and speak in terms of war. Another war may be inevitable—that is beside the question—but we make it much more probable, we bring it nearer, by constantly harping on it, stressing its imminence and talking of peace as a mere armistice between struggles. Certainly the commander of the American Legion might show more respect for those who died in the last war by emphasizing the ideals for which they fell and pointing out what progress has been made toward reaching their goal than by prophesying that war will soon be upon us again.

CHAIRMAN OF REALTY FIRM'S BOARD DEAD

BERGFELD, REALTY

uccumbs to Complication of Diseases at Age of 62 Years.

George F. Bergfeld, chairman o the board of the real estate and construction firm of that name, died today at St. Luke's Hospital, following illness of several weeks due to a complication of diseases. Mr. Bergfeld, who was 62 years old, organized the firm which he headed, 32 years ago, after he had worked as secretary of the old St. Louis Cubs, a professional base-ball team organized by the players as one of the "brotherhood" teams of that era.

The construction department of the Bergfeld company's business always had been under supervision of Mr. Bergfeld. He retired as years ago, and since had not been active in its affairs. Lucas Bergfeld, a son, now is president of the company. In addition to his son, Mr. Berg-

raining for war was a danger to Europe, he declared. Conscription Must Stop.

Declaring that until conscription was brought to an end in Europe nothing could be achieved, Lloyd George said the disarmament commission had become simply an algebraical farce. The two countries which had done the most "blather." which had done the most "blathering" about peace—Great Britain and the United States—were the only two which had increased their expenditure on armaments, and people would say: "Before you start lecturing us, cut down your own expenditure." Bridgeman said the British Cab-

net had decided to adhere to the six-inch gun limit because, it is consented to eight-inch guns it would not be signing an agreement but for their increase. The Cabinet took the decision, for which all the ministers were responsible. and it was a vital decision, from which there was no intention to

Tonnage Was Main Objection. Dealing with the allegation that the British Government had lost the chance of a nearly completed agreement with Japan because it nsisted on six-inch guns, Bridge-

man said: "When we discussed with the Americans the prospective agree-ment with Japan they did not turn it down because of guns, but for tonnage, and that was the trouble we had from start to finish. If the conference broke down on account of unpreparedness we ought not to be blamed."

He asserted the question of parity never had been discussed in the conference, and that not a single speaker in the debate had said the British proposals were wrong. "It is not parity with America that is troubling us," he exclaimed,

but our own security."
The most important proposal of Great Britain at Geneva, he explained, was reduction in the size of battleships and extension of their life, and he did not yet understand why the proposal was not acceptable to America. It was readily accepted by Japan, and he still lived in hope America might eventually accept it.

German Delegate for New Debate on Disarmament.

GENEVA, Nov. 25.—Count von Bernstorf, the German member of the Preparatory Commission on Disarmament, which will meet at Geneva on Nov. 30, desires a new debate on disarmament. The Rus-sian delegation is said to support sian delegation is said to support this view, but it seems doubtful the commission would agree to that course, because the object of that course, because the object of the coming session is to take note of the work accomplished thus far, and appoint a sub-committee to study the problem of security and

arbitration.

Nevertheless, the statements of the Germans and Russians are awaited with interest.

CENSUS PROPOSED IN GREECE

Territory and Population Has Changed Since 1921 Check. By the Associated Press.

ATHENS, Greece, Nov. 25 .- It is proposed to hold a census in Greece next year, as there has been none since Jan. 1, 1921, and great changes of territory and copulation have taken place since then.

Since 1921 Greece has lost East-ern Thrace with Karagatch, Imbros and Tenedos and Smyrna with its Hinterland. By the transfer of population, she has exchanged 380,036 Moslems and 49,511 Bulgarians for some 1,500,000 Greek refugees from Turkey and Russia and 26,500 Greek emigrants from Bulgaria. In 1921 Greece was known to have had a population of 5.536,735. At present it is variously estimated that her population ranges from 6,200,000 to 6,600,000.

Mammoth Cave system. Nevertheless, it remained on exhibition in Mammoth Cave for many years, and about 1850 disappeared. Natives of the region superstitlously spread the idea that spirits of the disant past had come forth, resentful of the prying eyes that gazed upon their queen—"Fawn Hoof" was unquestionably a queen—and had borne her remains back into some secret cavern. Others said that the mummy had been the nineteenth century, and "Fawa said that the mummy had been ven to some museum. "Fawn Hoof" was discovered

luring the digging of saltpeter earth. The body was wrapped in two deer skins, ornamented with imprints of vines and leaves. A woven or knitted sheet covered these. The color of the hair was dark red, and the teeth were white and perfect. A wound between two ribs, near the backbone, indiwoven or knitted sheet covered and perfect. SALOON TWICE RAIDED FOR ALLEGED SALE OF BEER

Police Captain Returning to Seek Lost Pen Finds Ice-Box Had

Been Filled After He Left. After seizing 65 bottles of alleged beer in the saloon of William Whalen, 1409 North Grand boulevard, yesterday, and placing the bartender, Larry Brown, under bond, Police Capt. George Tabb discovered his fountain pen missing. Returning to the saloon in search of the pen, he found 60 more bottles had been placed in the ice box. He seized the bottles and rearrested Brown.

WINTHROP, Mass., Nov. 25.— Many spectators suffered bruised heads and six soldiers and one player received injuries serious enough to require hospital treatment when riot broke out during the annual cootball game between Winthrop High School and Revere High at

Fort Banks yesterday.
Squads of soldiers with fixed bayonets were required to restore order as rocks and other missiles fell like hall among players and spectators. The disorders began when rival rooters fought for possession of a Winthrop banner. After some 25 minutes (pitched fighting, order was restored and the game proceeded, Revere win-

Air Pilot's Fine Reduced. WASHINGTON, Nov. 25 .- Penalties originally imposed upon 8 A. Reiss, the first airplane pilot to run afoul of the Government's air traffic regulations in the Washington area, were sharply cut down today by Secretary Hoover. Reiss killed a pony at Hoover Flying Field, near Washington, last October while playfully diving at the animal from the air in an endeavor to herd it off the field. The Comnerce Department suspended his license for 90 days and notified him that he was subject to a fine of \$500. The Secretary made the susension period 30 days and reduced

the fine to \$25. Negro Found Injured Dies. Shelly Gaines, a Negro, died at City Hospital No. 2 yesterday of injuries of the head and pper part of the body, suffered by him in some manner police have been unable to determine. He was found early Wednesday in a semiconscious condition, at Warne avenue and

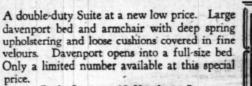

Lucky street. Earlier in the evening, Gaines, who is a pastry cook at a hotel in the West End, had phoned his wife that he was going out with another employe. The man with whom he left the hotel said he did not know how Gaines received his injuries.

Capt. Ault Explains Purpose of Ocean Surveys in Ship Carnegie.

Special to the Post-Dispatch.
WASHINGTON, Nov. 25.—Capt. J. P. Ault, Commander of the nonmagnetic ship Carnegie, in a lec-ture before the Carnegie Institu-tion of Washington, told of the purpose of ocean-surveys and the progress which has been made in this field of scientific activity.

The Carnegie, in the magnetic

survey work for which she was built, has been on six cruises. Preparations are now being made for the seventh cruise which, if present plans mature, will begin in May, 1928, and last for three years. In his lecture Capt. Ault said:
"The oceans occupy such a large

part of the earth's surface that knowledge of their contents and physical condition is of prime importance. Especially is this true in the study of any geophysical problem which includes the entire globe. Human life and its environment on land and the evolutionary processes in all the living world are influenced in countless ways by the varying physical properties of Problems To Be Solved.

"In geophysics our knowledge of the origin of the earth's magnetic and electric fields is still imper fect. The exact interrelationship between these two fields is not fully known, and we are interested in securing more information regard ing the close connection which seems to exist between variations in magnetism, atmospheric elec-tricity, auroral displays, earth-currents, and transmission of wireless waves around the earth. Observations over the comparatively undisturbed ocean areas will very materially aid in the discussion of all these phenomena."

Discussing the Carnegie's next voyage he said: "It is planned to obtain water-samples and temperatures rfom the surface down to the bottom when not in excess of 20,000 feet, every 200 miles, to study the dynamics of the sea, and to investigate the physical and chemical properties of sea water. Bottom samples of mud and sediment will be secured, depths will be measured with the latest type of sonic depth-finder, and the life of the sea will be studied by use of tow-nets and special water-bottles. It is planned also to enlarge the program in marine mete-

Value of Data Obtained. "In spite of the vast amount of data already collected we have only a general idea of the contours of ocean bed and only a meager knowledge of the bottom sediments, which are of peculiar interest to the geologist in his study of the age and formation of the earth, and the changes which time has witnessed. Such information is necessary for the study of the movements within the earth's crust and for the seismologist in his study of the origin, history, and prebable future development of submarine earthquakes.

"Increased data relating to atmospheric conditions at sea will be

of seven lives.

Two bodies were recovered last night after a blaze of undetermined origin had started in the 2250-foot level and swept through all the timbered section below the 1650foot level. Little hope was held out for five men reported missing. There were 49 men in the shaft when the fire started and 42 escaped. Late last night dense clouds of smoke were pouring intermit-tently from the shaft and mine of ficials, abandoning hope for the five missing, ordered the mine flooded. Juan Branbila and John McMahon were the men whos

Illinois Poets Represented

By the Associated Press. SPRINGFIELD, Ill. - Five Illinois poets, all of them men, have won representation in the Third Book of Modern Verse, compiled by Jessie B. Rittenhouse. Offsetting this masculinity in a measure, however, is the fact that in "Love's Highway," a collection by Mrs. Waldo Richards of modern love poems in the English language, the only Illinois poet represented is a woman. Vachel Lindsay, Carl Sandbourg, Lew Sarett, Edgar Lee Masters and J. U. Nicholson are the Illinois poets whose verse is included in Rittenhouse collections Lindsay, Sandburg and Sarett have three poems apiece in it, Masters three poems and Nicholson one. Harriett Monroe is the Chicago poet whose poem entitled "A Fare-well" has won a place in the col-lection of love poems.

Rash On Baby Itched Terribly Cuticura Healed

"When my baby was two months old a rash broke out on his face. It kept getting worse all the time. Later it turned into blisters that would break, and itched and burned terribly. He used to scratch his face until it would bleed. He could not sleep at night on account of the irritation, and kept me awake. His face was badly disfigured.

"A neighbor advised me to try Cuticura Soap and Ointment so I purchased a cake of Soap and a box of Ointment. After a couple of applications he slept better, and in about a month he was completely healed." (Signed) Mrs. H. Steines, 5622 Ellis Ave., Chicago, Ill.

NEW YORK, Nov. 25.—The United States will challenge for the Davis cup in the American zone

next year in an endeavor to regain the trophy emblematic of the world's team tennis championship, the Davis Cup Committee of the United States Lawn Tennis Association decided yesterday.

This action calling for the playing of the preliminary rounds will be presented to the Executive Committee of the association for approval next month and with the sent the 1928 challenge will be forwarded to France before Jan. 31 when entries close under the

Careful consideration was given to the question as to whether the United States should challenge in the American or European zone. Heretofore, that phase has never two-zone system of play took place after the United States won the cup from Australia in 1920. In the role of cup defender, no preliminary play was necessary. Now France occupies this position.

European Match in June. Several factors entered into the ons of the Davis Cup Comnittee, if the team was to play in the European zone, it would probably require sending players abroad the latter part of March as the first May 1 and a reasonable training On the other hand. American zone play need not be-gin before May and if the United States won here, it would not be required to proceed to Europe be-

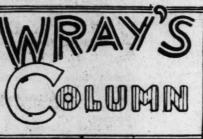

As several members of the 1923 team will probably be college stu-dents, in the opinion of the committee it was considered unwise to ask them to curtail their studies for tennis play, which might seriously interfere with their gradua-ion. By entering the American sone, several combinations of playrs might be used in the different ches, thus effecting a saving of ime required of the American participants. It was also the findng of the committee that after upporting the two-zone system as nerica's leading tennis exponent, would be unsportsmanlike to deert the play here in favor of Euope as soon as placed in the chalger role. Several other Amer zone nations have expressed he hope that the United States ild play here.

As soon as approval is received by the Davis Cup Committee, tennis rangements will be made to line ip the leading tennis talent for the npetition. These players would lude William T. Tilden, Wilam M. Outdoing Cochems.

D.R. EDDIE MURPHY, the tiny quarterback of the Cochems machine of 1906-7, in the Post-Dispatch of Nov. 23 declared he thought the forward-passing plays of the former Billiken foot ball wizard were better than those of the coaches of today.

Cochems had a lot of stuff and double passes were not wanting. But it is questionable if he ever showed a better conceived or executed pass play than that employed by Bob Higgins' team in scoring the first touchdown yesterday. The forward pass pulled the defense like a magnet, leaving Harnett with a clear field for the ensuing lat-

Letter Found After Illinoisan Attempts Suicide and Fires on Police.

CHICAGO, Nov. 25 .- McClyde Robinson, 31 years old, son of a Livingston County farmer, who fired on policemen sent to his hotel room to arrest him Wednesday night and then tried to kill himself, had planned to slay his fiancee, according to letters found yesterday.

Robinson probably will die. He had purchased wedding fin ery for Mrs. Lorraine Logan, 28year-old divorcee and mother of two children and policemen went some of the clothing was found to be worthless. They found Mrs Logan and one of her children in

he room with him. Robinson asked for permission to telephone his mother at Emington to have the check made good but, instead, entered a bathroom fired a shot into his head and then fired nine shots through the door at the detectives, but hurt no one. A letter in his pocket said that his fiancee had "played" with him and indicated his intention to kill her and himself.

Robinson, who was to have been married yesterday, was taken to a nospital. Doctors expressed amazement that he was able to live, as the bullet had penetrated his brain. Annoying

The first thrusts of power within the cylinders of any automobile engine play havoc with cylinder walls and bearings

if the oil is slow to flow.

Any engine, at any season, is a better piece of machinery if it has the cooperation of Texaco Motor Oil. It is essential in any engine in cold weather. And the fast-moving pistons in modern high-compression engines simply demand Texaco Motor Oil, which flows freely at zero, and still has full viscous body to stand up under heat.

Is the American Woman Spoiled?

MERICAN cities are producing A a large number of idle wives, as socially demoralizing as loboes, declares David Smedden, proressor of education at Colum

"The American woman," charges Louis Bromfield, Pulitzer prize novelist, "has been placed on a pedestal she does not deserve. If she bears one child she thinks she has performed a miracle. As a rule, the American woman is unfair. She gives very little. The takes it for granted that she's 'it,' and the men let her get away with this; almost every man in this country works himself to death.

"It is really astounding how American men worship their women. They handle them as if they were china-doll goddesses. A tremendous, press-agented reverence has been developed about the holiness of motherhood. After all, bearing children is only no of a woman's business. The thing has

been going on for some time."
So it has, but men have man aged to escape the thing's da igers, difficulties, drudgery. Therefore, they can afford to be flippant about it. We do think that the act of physical motherhood may be made too sentimentally heroicyet it is agony, it is risk of death or invalidism, and many men make more fuss about having a tooth more fuss about having a tooth pulled than women make about having a baby.

CUBBY was looking at his first snow. It was the day after Thanksgiving. Cubby had had a

Only when this money was spent, according to the indignant young men, would "the girls" return to their domestic duties.

Mr. Sun was just going to bed behind to be done think to be done think to be done the purple Hills, but no one could see this, for a great bank of clouds hid jolly, round, red Mr. Sun. And it hid the tops of the purple Hills, too. At first Cubby return to their domestic duties.

Here's a man who undoubtedly idea where they were, and so after thinks that the American woman is spoiled, and indeed it isn't fair that he, or any other man, should have to shoulder the triple burden of wage earning, housekeeping and baby tending. And yet—is life wholly fair to these young women who was hould hang on to his arm shut up in the little homes, day wholly fair to these young women shut up in the little homes, day in and day out, with housework and children? "Kitchen stoves and washtubs are worse tyrants than the spindles and punch presses of industry," Prof. Paul H. Douglas of the University of Chicago told the recent Conference on Family when he had gone to hed the court. The didn't that it, was harmless, for there was should hang on to his arm how will they change when crossing the street? Chatterer scampering across the foot for tree to another. Cubby stretched. Then rather gingerly he walked out. It certainly felt queer, but it was not altogether unpleasant, Cubby walked a little way and looked back.

And then his eyes flew very wide open indeed. You never did see so in the visit was not altogether unpleasant, Cubby walked a little way and looked back.

"My goodness!" he exclaimed.

Yet Mary Borden's selfish and glided goddesses form an infinitesi-mal percentage of American womanhood. Most of us, not being the wives of New York's multimillionaires, have other things to do than getting down from shrines to compare our pearl necklaces!

THE truth seems to be that some American women are spoiled—as abominably spoiled as when David Graham Phillips a quiet life." did the best of all the fictional denunciations of them in "The Husband's Story." in gures are exceptions now. People and about you have learned by experience how easy it is to reduce.

The modern way is Marmola prescription tablets. People have used them for 20 years—millions of boxes of them. They have told the results to others, and the use has spread. Now slender figures everywhere show what Marmola does.

Marmola supplies a substance which largely controls nutrition. It aims to increase the factor which turns food into fuel and energy rather than into fat. There are no secrets about it. The formula appears in every box, also explanations of results. This to avoid any fear of harm.

No abnormal exercise or diet is required, though moderation helps. One simply takes four tablets daily until weight comes down to normal.

Go let Marmola do for you what it has done for so many. Watch the results in new beauty, new vitality, new health. Then tell your friends who need it. Order now, before you forget it, and learn what folly it is to stay fat.

Marmola prescription tablets are sold by all drugaist at \$1 per box.

MAKE the foods for your children tasty and inviting and the choosiest boy or girl will eat them with zest. Oatmeal can be made temptingly tasty. A little Price's Vanilla added will give it a deliciousness, a delicacy of flavor that children simply can't resist.

At our request, Caroline B. King, the noted food authority, has prepared a booklet, entitled "35 Appetite Helps for Mother," telling just how to flavor oatmeal and other cereals to tempt finicky children's appetites for these wholesome and needful foods. The recipes call for the use of various Price Flavoring Extracts-particularly Price's Vanilla - the original true, tropic flavor of rare excellence and strength. Send for the booklet. CRICKET-AND LOVE.

Before you do it, ask yourself "Is it cricket?"

A thoroughbred is a man who knows instinctively what IS and what ISN'T "cricket." That's all!

He may be a billionaire, a ball-player, a poet or a prize-fighter -but he is never a bounder. He may wear an opera hat or overalls -carry a swagger stick or a spade - but he always carries his "code"! And his code is "Play the game!"

Even in this day and degeneration, when most all manners are beginning to be classed with hoopskirts, bustles and pompadours, there is such a thing as "cricket"!

Cricket is fairplay! Cricket is good breeding. Cricket is somethin, finer than mere honesty, more delicate than a sense of honor, and harder to explain than a French irregular verb.

Even in love as in war where "all is fair," there is always cricket-yea even amongst vamps and petters and cake-eaters and sheiks! Just as there is honor among thieves.

"It isn't cricket," Cherie, to let one man pay for the tickets, the reses, the taxi and the supper, and then spend all your evening flirt-

It isn't cricket, Big Boy, to take a woman out to dinner, and make her look foolish by casting admiring glances at all the other women present, or flirting with another girl behind her back.

It isn't cricket to accept gifts, expensive attentions and devotions fron. one man, and then to give your dances and your kisses to an-

It isn't cricket to hold your husband up to ridicule or to belittle your wife before others, no matter how much you may hate or love

It isn't cricket to flatter one woman by speaking disparagingly of enother woman; or to tickle one man's vanity by breaking a date

It isn't cricket to borrow money that you are not certain you car return. Or to sue for alimony after two weeks of wedded bliss.

Or to bully a waiter, because you know that he can't answer back. Or to kiss-and-tell. Or to hit-and-run!

You may be awfully modern and "hard-boiled" and hot for "individualism"-and all that sort of bunk. You may not believe in romantic love or old fashioned ideals. But down in their heart of hearts, every man and every woman wants to be a THOROUGHBRED.

Cricket is never doing anything unfair or ungenerous. Cricket is a sense of noblesse oblige. Cricket is playing the game!

Cricket is being a thoroughbred!

The reason is the exact power regulation in Sterling "B" Units. Just enough power—not too much, and not too little—enables the Sterling to impart tone quality supreme to practically every 4 to 8 tube set, to Radiolas, or to Victor and Brunswick radiophonograph models.

Compact, permanent, trouble-free—everything that a Power should be. And astonishingly low in price!

"Tiny Town" Is Ruled by Women

ISSOURI has a "tiny town." I is a village composed of 10 houses, with a population of exactly 35, and women rule it.
Urbandale, the 'tiny-town,' is located on the outskirts of Moberly. Mrs. Ruth Stamper Fleming, chairman of the village board, can count offhand the noses of the town's cit-

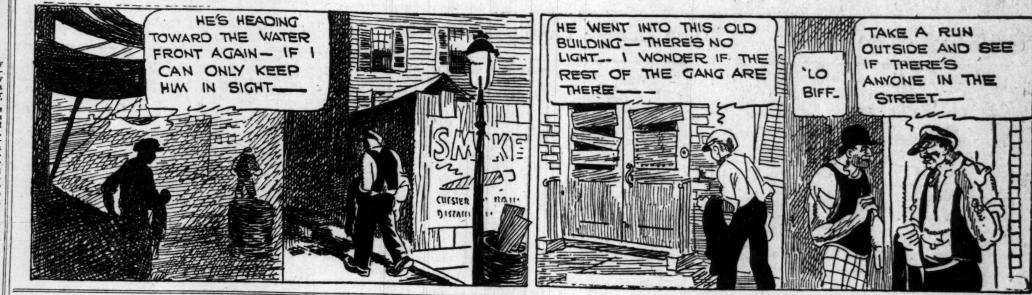

Urbandale was incorporated this fall when residents of the little settlement decided it could function better in a civic way if it were an entity unto itself. Deciding that women should rule

the village, the men quietly electe governing board composed en-At first astonished, the women immediately got busy on a "city beautiful" program. They provided that each house should stand in a tract of two acres or more and that no commercial enterprises should be established on Urbandale's main

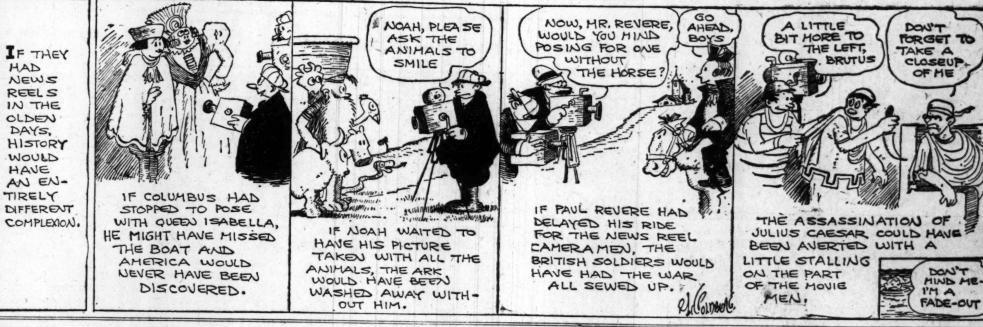

street, which is its only street.

Board members, immersed in civic problems, say the petticoat government probably will be ready to retire at the next election in Bobby Thatcher-By George Storm
